

OEM Humidity & Enthalpy Sensors

Model HU-921 & EN-931

- **HU-921 Humidity Sensor** -- 3% accuracy, temp-compensated, voltage or current output. Two versions available -- supply/discharge air and the other for return air applications. Numerous termination options -- quick connect, terminal block or molex/amp connectors for wire harness. More than 13 types of thermistor or RTD sensors available as an option.

Enhanced replacement for the C7600 and HE-67N3.

- **EN-931 Enthalpy Sensor** -- 3% accuracy, silicon RTD for dry bulb temp sensing. Fully calibrated voltage or current output. Quick connect, terminal block or molex/amp connector options available. Rugged glass-reinforced polycarbonate enclosure designed for factory in-duct installation.

Enhanced replacement for C7400-series sensors.

Incorporate MAMAC's proprietary cross-linked polymer-sensing technology immune to dust, condensation, salt spray, cleaning solvents and wind-driven rainfall. Conformal-coated and moisture-sealed circuit board can handle direct immersion in water. Five-year warranty. Made in USA.
